DETAILED ACTION

This office action is in response to applicants' communication filed on 4/2/2007.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stewart et al (USPAP 2003/0135457 A1) ("Stewart") in view of D'Amico et al (USPAP 2001/0034641 A1) ("D'Amico"), and further in view of Ricketts et al (USPN 6901383) ("Ricketts").

Application/Control Number: 09/502,313

Art Unit: 3691

Stewart disclose a method and apparatus for providing online financial account services

comprising receiving a subscription to open and fund a new deposit account online through a

web site of a financial institution 10. The customer 20 is directed to the web site of the financial

institution by web-based advertising or other links, by a web search engine or by directly

entering the site's URL address in a web browser. The web site provides information related to

accounts and other services offered by the financial institution (see page 5, paragraph (0057).

Stewart disclose that the financial institution 10 can be a bank or any other type of financial or

investment services company offering deposit based services and that the deposit account can be

a checking or savings account, a certificate of deposit, a money market account or any other

suitable financial account (see page 2, paragraph (0016)).

Stewart does not specifically disclose that the financial account to be opened by the

customer 10 at the investment services company can be a mutual fund account and providing the

total number of subscribers at the end of the subscription period.

D'Amico discloses prospective customers purchasing shares of a mutual fund by

contacting the mutual fund on the Internet, requesting an application and then submitting the

completed application along with the appropriate funds to the fund advisor (see page 3,

paragraph (0047)).

It would have been obvious to one of ordinary skill in the art at the time that the invention was

made, in view of the teachings in D'Amico, to allow a customer of the Stewart method, to both

open and fund a mutual fund account over the Internet, thereby expanding the customers

investment options and enabling the customer to buy and sell mutual fund shares online.

Art Unit: 3691

Ricketts discloses determining the total number of investors (subscribers) for each series 602, period 604 and date 416 (see col. 17, lines 7-8, col. 8, lines 11-13).

It would have been obvious to one of ordinary skill in the art at the time that the invention was made, in view of the teachings in Ricketts, to allow the financial institution of the Stewart method, to track the number of customers that open and fund a mutual fund account within a time period.

Regarding claims 5 and 13, the examiner takes official notice that a series of linked web pages where the user can create a new account is old in the ad (see the cited reference to Joseph (USPAP 20010034690, paragraph (0039) and Rinaldi (USPAP 20020016756, paragraph (0028)). In view of this official notice, it would have been obvious to one of ordinary skill in the art at the time that the invention was made, to modify the user interface of the Stewart/D'Amico/Ricketts combination method with linked web pages, so as to utilize a well-known and convenient user-friendly interface.

Regarding claims 7, 8, 15 and 16, the examiner takes official notice that scrolling banner and animated banner advertisements are well known in the art of advertising on the web. In view of this official notice, it would have been obvious to one of ordinary skill in the art at the time that the invention was made, to use banner advertising at the users computer interface in the Stewart/D'Amico/Ricketts combination method and thereby avail of an efficient and proven method of advertising on the internet.

Art Unit: 3691

Response to Arguments

Applicant's arguments, see "Remarks" (page 7), filed 4/2/2007, with respect to the rejections of claims 1-16 under 35 U.S.C. 103(a) have been fully considered and are not persuasive.

The applicant argues that the Ricketts reference does not show that the total number of subscribers of a mutual fund is provided to mutual fund management responsive to the end of a subscription period. Examiner respectfully disagrees. The Examiner has established the obviousness of establishing and subscribing to an online mutual fund. Examiner asserts that the specific step of providing this information to the management is obvious because all the information (including the total number of subscribers and the number of units bought per subscriber) associated with the subscription as gathered by a host server (subscription details sent by subscriber and stored in a host) would be accessible to the asset managers for processing and accountability purposes (i.e. total number of units/shares purchased as well as for gain/revenue/dividend reporting and/or sharing).

Ricketts reference teaches the concept of determining the total number of investors (including investors in mutual funds) for a given period (see col. 17, lines 7-8, col. 8, lines 11-13).

With respect to applicant's challenge of the Official notice, the examiner notes that the Official notice was taken before the Board of Appeal decided the case. Therefore, examiner asserts that this feature is considered to be admitted prior art (since applicant did not challenge this previously in a timely manner). See also Rinaldi (USPAP 20020016756, paragraph (0028))

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olabode Akintola whose telephone number is 571-272-3629. The examiner can normally be reached on M-F 8:30AM -5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on 571-272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
